28. Description of Change: (use additional Sheets if necessary) Required updates to the COTS Version map and HW/SW map have been identified from several sources: CCRs for baseline changes and updates required as part of the discrepancy resolutions process. Bundled OS items have been individually removed from the baseline, when installed as part of the standard installation, as these are upgraded, patched and versioned as part of the baseline: these items include: CDE (HP/Sun), OSF/Motif, X11, NFS, Imake (SGI/Sun), SNMP agent (Sun, SGI, HP, PC). Items that are installed or versioned separately will be specifically identified. COTS Version Baseline specification revised to reflect this change.
